

VC -11138 – UNDER WATER HULL INSPECTION FOR MARINE GROWTH WITH VIDEOGRAPHY

Scope of Work:

The Outer Hull of VC 11138 (Underwater) is required to be inspected for the marine growth and cleaning if required (i.e., removal of barnacles). To have a better view of the extent of Growth due to long stay over 6 months from the date of un-docking. It is recommended to inspect the Outer Hull under Water for the excess Marine Growth if any, with the help of Videography.

1. The party has to arrange underwater video coverage to identify the marine growth under the supervision of CM (OC).
2. The party has to arrange Cleaning of barnacle / Marine Growth.
3. The Party has to undertake Re-inspection of under – water hull with videography after removal of barnacle under the supervision of CM (OC).

The Entire job to be completed within 2/3days from the date of receipt of LOI/Work order.
